

PRE-TRIP MODULE

Automatic Pre-Trip Inspection

FEATURES & BENEFITS

- ◆ Automatically turns on/ off all chassis controlled exterior lights for driver examination
- ◆ Systematically takes the inspector through a light function test at each exterior check point
- ◆ Ensures exterior lights are operating properly before vehicle is put into service
- ◆ Assists driver with exterior test without additional personnel
- ◆ Improves efficiency of pre-trip walk-around inspection
- ◆ Plug & Play to OEM chassis– No splicing into OEM wiring
- ◆ Ford & GM applications

WHAT DOES IT DO?

The Pre-Trip Module automatically turns on & off lights (including brake & reverse lights) thus allowing one inspector to complete a walk-around inspection by themselves and quickly. Using one inspector efficiently saves the fleet time & money while ensuring a high quality inspection.

HOW DOES IT WORK?

- ◆ Vehicle must be in park with park brake set & “light test” switch on
- ◆ Exterior lights are activated in a pre-determined sequence as an inspector walks around the vehicle
- ◆ The sequence is repeated until the light test switch is turned off
